Kindergarten (KG)

Weekly Planner

Dear Parent
Greetings!!!

Hope you all enjoyed helping our kindergarten students engage themselves with last week's activities.

And we are sure you are looking forward to this week's activities and worksheets.

So here we go !!

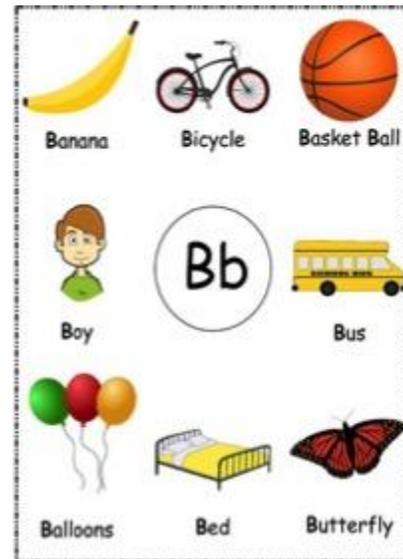

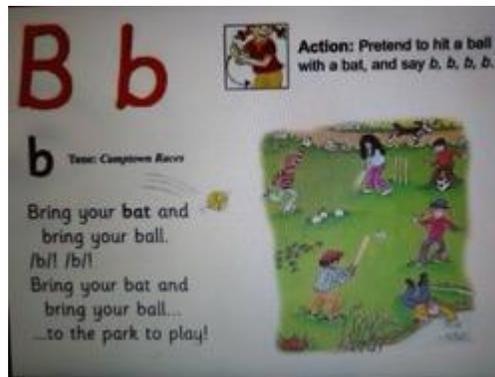

English

This week two letters are coming to your house.

Letter Bb and Letter Cc .

Let's revise their names and sounds by singing the phonics song aloud.

Here's the **link** to the song: <https://www.youtube.com/watch?v=1Qpn2839Kro>

Activity

Make two placards of letter 'B' and 'C' each and collect few objects which start with same letters like ball, bat, candle, crayons etc. Place the objects and 'B' and 'C' placards on the table. Now ask your child to pick up the object ,say its name and recognise the sound. Then ask your child to place the object either on the 'B' sound placard or 'C' sound placard. In the same manner sort all the objects and place it on the respective placards.

Enjoy playing this fun game with your little one.

Opposite Activity

This activity is simple, effective and can be done easily at home.

Instructions -

Select a few easy opposites, such as sad-happy, up – down and have your child act them out. Also encourage them to speak the opposites out loud.

A few list of opposites that you can use:

- **Happy – sad-** make happy face or sad face
- **Up – down** -actions can be look up and look down or put your hands up and down.
- **Open - close** - open and close your eyes, open and close your mouth, open and close a box or a container.
- **Big - small** - show an identical object that is big and small like a big ball and a small ball.
- **Inside - outside** - put a toy inside a box and outside a box.
- **Hot - cold** - take a glass of cold water and a glass of little hot water and make the children touch and feel both the glasses
- **Slow - fast** - roll your hands slowly and then fast, action of eating slowly and then fast etc.

Enjoy the game!

Numeracy

I am sure your child must have enjoyed counting the spoons and helping you with the same in the kitchen. Let's have more fun this week with another playful activity.

Say a number to your child and let them do various actions (clap, jump, blink your eyes, tap your foot etc.) that many times. For example – if you say the number 4, the child should jump on the spot 4 times. Similarly if you say the number 3, this time your child should do something else , say clap 3 times.

Value Education

Last week we learnt about ‘Myself’ so this week let’s understand the importance of ‘**Cleanliness**’.

Having good personal hygiene habits not only helps in keeping oneself clean but also prevents us from getting sick.

Habits that we must practice everyday:

- ✓ Washing Hands
- ✓ Brushing Teeth
- ✓ Taking Bath
- ✓ Combing Hair
- ✓ Keeping nails short and clean

Here’s a **link** to the song for you all that you can sing while washing your germs away.

Fun Activity

Sink or Float -This boosts your child's scientific learning

Instructions:

Collect a few toys and fill up a bucket with water (you can even do this during bath time).

Drop the items into the water, one by one to see which one sinks or floats.

Example: A small ball, coin, a leaf, a crayon, a button etc.

Use objects of different weights so that your child can understand the difference between the two.

Enjoy the game!
